Psychological Research - Crash Course Psychology #2 - YouTube COURSE DESCRIPTION: This course provides an introduction to psychological research techniques and methodology. Topics to be covered include the logic of Descriptive or Correlational Research Methods. Case studies, surveys, naturalistic observation, and laboratory observation are examples of descriptive or correlational research methods. Using these methods, researchers can describe different events, experiences, or behaviors and look for links between them. Research Methods in Psychology Since qualitative information can be handled as such statistically, the distinction relates to method, rather than the topic studied. There are three main types of psychological research: Correlational research. Descriptive research. 830:355 Research Methods in Psychology - Department of Psychology Research Skills for Psychology Majors: Everything You Need to Know to Get Started.
